- **Cheryl Bartel**, Reference Librarian, UCLA Biomedical Library
- **Natalie Kamper**, NLM Fellow, UCLA Biomedical Library

“Health Statistics: Navigating the Data” is designed to improve participants’ ability to find health-related statistics quickly and efficiently. Through a combination of group activities and hands-on exercises, lectures and discussions, participants will learn to frame an effective statistical reference question, identify the appropriate public health information source, and ultimately find the answer they need. Upon completing the class, participants will be familiar with the public health structure, data collection methods, data types, and alternative information sources.
